

### **REMARKS**

According to *MPEP §1302.01*, a brief summary of an invention should be in harmony with the claims. Applicants herein amend the summary and additional parts of the written description so that the description is brought into greater harmony with the subject matter being claimed. *See MPEP §1302.01*

For the convenience of the Examiner, the amendments to the specification are presented in the form of a substitute specification. The amendments to the specification include a newly presented summary and amendments to the Title, and Detailed Description (now reformatted to include text formerly presented in the Summary) so that the specification is more in harmony with the broad subject matter being claimed. *See MPEP §1302.01*. Also included herein are minor claim amendments addressing various informalities. The appropriateness of the various claim amendments is clear from the context of the previous response by applicants. The claim amendments do not alter the claim scope, and accordingly, the claim amendments will not be regarded as narrowing claim amendments. No amendment presented herein contains new matter.

The amendments presented herein were not presented earlier for the reason that the review yielding the determination that the amendments would be desirable was not conducted until after the close of prosecution.

Accordingly, in view of the above amendments and remarks, applicants believe the present application to be in condition for allowance.

If the Examiner believes that contact with applicants' attorney would be advantageous toward the disposition of this case, the Examiner is herein requested to call applicants' representative at the phone number listed below.

The Commissioner is hereby authorized to charge any fees associated with this communication or credit any overpayment to deposit Account No. 50-0289.

Amendment After Allowance to Accompany Issue Fee Payment dated April 24, 2007

Dated: April 24, 2007

Respectfully submitted,

By George S. Blasiak
